

GGGCAGTTAG

The image displays a DNA double helix structure. The backbone is represented by a yellow line. The base pairs are colored and arranged as follows: G (green) paired with C (blue), G (green) paired with C (blue), A (red) paired with T (orange), A (red) paired with T (orange), T (orange) paired with A (red), and G (green) paired with C (blue). The sequence GGCAGTTAG is written in large, bold, colored letters above the helix, with each letter corresponding to a base pair in the structure.
