

T G A C G C A A

The image displays a DNA double helix structure. The top strand is composed of eight nucleotides, each represented by a large, bold, colored letter: T (red), G (orange), A (green), C (blue), G (orange), C (blue), A (green), and A (green). The bottom strand is composed of eight nucleotides, each represented by a large, bold, colored letter: G (green), C (blue), T (red), G (orange), T (red), G (orange), C (blue), and C (blue). The base pairs are: T-A, G-C, A-T, C-G, G-C, C-G, A-T, and A-T. The structure is shown in a perspective view, with the strands curving upwards and outwards.
